

## INFORMIX TRAINING

### Chapter1: Introduction to IBM Informix Dynamic Server

- What is Informix?
- Informix Architecture
- Understanding Informix components

### Chapter2: Installation & Configuration

- Install and Configure Informix and client SDK
- Setup Environment
- Managing disk space
- Configuring connectivity and security

### Chapter3: Client Server connectivity

- Host name & Service name field
- Communication with Protocol
- TCP/IP Protocol
- Multiplex Connections

### Chapter4: Monitoring Database

- API Functions
- Sysmaster Database
- Sysadmin Database
- SMI Tables

### Chapter5: Shared memory configuration

- Understanding shared memory
- Usage of shared memory
- Buffer pool and virtual portion
- Monitoring shared memory

### Chapter6: Introduction to Virtual Processors and Threads

- What are virtual processors?

- Advantages of virtual processors
- What is thread?
- Types of thread
- Stacks, queueous, Mutexes

#### Chapter7: Overview of Disk

- Allocate the memory disk space
- Understanding chunk
- Manage and display databases
- Disk usage
- Multitenancy

#### Chapter8: Backup and Restore

- Introduction to Backup Methods
- What is Logical backup and restore?
- What is Physical backup and restore?
- Planning and scheduling backups
- Evaluating memory resource and time

#### Chapter9: Overview of Troubleshooting

- Basics error messages
- Setting Event Alarms
- Troubleshooting Resources
